CA-IR-158

Ref: HECO T-14, page 27 (R&D – New Technology – AMI).

The 2009 test year estimate for the AMI project of \$414,000 is comprised of \$291,000 for vendor/consultant fees and \$123,000 for base station leases. Please provide the following:

- a. The vendor/consultant fee estimates are based on prior vendor proposals and 2009 work scope cost estimates.
 - 1. Please identify and provide a copy of the "prior vendor proposals" relied upon for purposes of preparing the 2009 forecast.
 - 2. Has HECO actually contracted with the vendors and/or consultants that submitted the proposals reference in subpart (a)(1) above? Please explain.
 - 3. Please describe the current (August 2008) status and 2009 expected status of the vendor/consultant work envisioned by the referenced prior proposals.
- b. The lease rent estimate represents 2009 unit pricing for four Tower Gateway Base Stations in the test year.
 - 1. Has the Company actually executed a lease agreement and commenced making lease payments for these base stations? Please explain.
 - 2. Please provide a copy of the lease agreement.
 - 3. When did (or will) the Company take possession of the base stations? Please explain.
- c. Does the 2009 test year estimate of \$414,000 include an assumed escalation factor for the vendor/consultant or lease rental components? If so, please provide and explain the origin of the escalation rate, showing how such rate was employed in preparing the test year forecast estimate.

HECO Response

(Attachments 1 to 4 to this IR response contain confidential information and will be provided upon the issuance of a Protective Order in the instant docket.)

- a. The Company estimated its vendor/consultant cost by reviewing the following contracts:
 - (1) eMeter Corp. ("eMeter") contract (Attachment 1) to research and test the capability of eMeter's EnergyIP™ software platform to support the advanced functionality of smart metering technology from Sensus; (2) Itron, Inc. ("Itron") contract (Attachment 2) as a second vendor, in addition to eMeter, to test Itron's Enterprise Edition (IEE) meter data management system ("MDMS") software platform; and (3) three separate contracts (Attachment 3, pages 1-9, 10-17, and 18-25) with Luminant Consulting Group, LLC

("Luminant") for information technology ("IT") support to integrate the Sensus AMI system with eMeter's and Itron's software platforms.

The Company's current plan is to extend the eMeter contract into the first quarter of 2009, select either eMeter or Itron for Phase 2 for the remaining nine months in 2009, and contract with Luminant to continue information technology support. Based on the Company's review of the project, the current 2009 vendor/consultant cost estimate is \$487,700, which is \$196,700 higher than the \$291,000 submitted in HECO T-14's response to CA-IR-2, Attachment 12 (see also HECO T-14, page 27, line 21). The breakdown of this new 2009 cost estimate is as follows:

Extend current eMeter contract into first quarter 2009	\$ 21,750 ¹
Select either eMeter or Itron for Phase 2 testing	$65,250^2$
IT support and development service	$325,700^3$
IT support for a New RD&D objective resulting from HCEI	$75,000^4$
Current 2009 vendor/consultant estimate	\$487,700

The Company will submit its updated cost estimate at the next opportunity.

- 1. See Attachments 1, 2, and 3 referenced above.
- The contract effective dates are: June 2008 for eMeter, August 2008 for Itron, and June 2008 for the three Luminant contracts.

 $^{^{1}}$ eMeter systems monitoring and administration services, part-time support @ 50%, 3 months x \$7,250 = \$21,750 (See Attachment 1, page 11)

² For Phase 2 testing, the eMeter contract's monthly charge is used, 9 months x \$7,250 = \$65,250 (See Attachment 1, page 11)

³ IT services are needed to support the functional demonstration of the MDMS to include support for the C&I FlexNet meters and customer presentation options for the Dynamic Pricing Pilot program, demand response programs, and AMR interfaces to the new customer information system. The three Luminant contracts total to \$190,000 (\$41,000 + \$75,000 + \$74,000) to support Phase 1 over a 7 months period from June to December 2008. (See Attachment 3, pages 2, 11, and 19) The current 2009 estimate is derived as: \$190,000 / 7 months x 12 months = \$325,714, say \$325,700.

⁴ IT support for the new RD&D objective resulting from the HCEI includes additional customer presentation options (i.e. web services, in home display, and thermostat control displays). The Company is still in the process of finalizing this statement of work to obtain a firm cost estimate. Preliminary estimates have ranged from \$70,000 to \$225,000.

3. The current status of the eMeter and Itron pilots includes the on-going activities to install and configure the MDMS software, provide basic user functional training, implement interfaces with the Sensus AMI system, and provide systems monitoring and administrative support services. The 2009 cost estimate for MDMS work assumes the following: 1) the selection of a preferred MDMS vendor in the second quarter of 2009 time frame, 2) a contract extension through all of 2009 of Phase 2 – Back End Data Exchange and 2-Way Communications, of the preferred MDMS vendor's software system, which will include demonstration of 2-way on-demand communications for remote connect/disconnect services and on-demand reads, and testing of key utility applications for automated meter reading ("AMR") billing, time of use and dynamic pricing, and 3) continued systems monitoring and administrative services.

For Luminant, the 2009 estimate for IT consulting services assumes a contract extension in 2009 for programming development work to produce interfaces between the Sensus AMI system and the selected vendor's MDMS to demonstrate the utility application benefits such as: AMR billing, dynamic pricing, time of use, load research, and demand load control.

b. The lease rent estimate represents 2009 unit pricing for four⁵ Tower Gateway Base ("TGB") Stations in the test year.

included in the T&D area. See HECO T-8, pages 53-54 and HECO T-8's response to CA-IR-2, Attachment 7A, project P0001559, and Attachment 7B, page 3, note 4.

⁵ In January 2007, another TGB Station was installed at Mauna Kapu to support the Ocean Pointe subdivision to test the automated meter reading (AMR) technology to bill residential and commercial customers in that subdivision. With completion of the pilot and start of actual AMR billing services in July 2007, this TGB was placed into production. Hence, this unit is not included as part of the 2009 test year R&D expense. See HECO's response to CA-IR-182, page 2, in Docket No. 2006-0386. This TGB's lease rental (\$3,000 per month x 12 months) is

Yes. Refer to Attachment 12 of B. Tamashiro's HECO T-14 response to CA-IR-2 for a detailed calculation of the test year amount of \$123,000 in TGB lease expense. The monthly lease cost is \$3,000 per TGB per month. The executed lease agreements are:

 Five Regents and Hawaii Prince Hotel (Prince Kuhio) TGBs – started in
 September 2006 and filed as Attachment 1 in HECO's response to CA-IR-182,
 Docket No. 2006-0386; 2) Puu Papaa and Koko Head TGBs (Attachment 4) – started in November and August 2007, respectively, due to difference in commission dates for these two TGB sites. The Puu Papaa and Koko Head TGBs are currently being used to collect baseline electricity profiles from approximately 400 residential advanced meters to support the proposed Dynamic Pricing Pilot ("DPP") program.

For the 2009 estimate, HECO included 41 months of lease rent payments at \$3,000 per month, amounting to \$123,000 to coincide with the estimated timing of the contract renewals and commissioning dates of the four TGBs used in R&D projects.⁶

- 2. See response to b.1 above.
- 3. The agreements do not transfer title of the TGBs from Sensus to HECO. The current (and future) lease agreements for these TGBs are accounted for as operating leases. There are no current plans to obtain ownership of the TGBs or other AMI System components not already owned by HECO. However, HECO plans to file an application for approval of a full-scale AMI project in the fourth quarter of 2008 at

⁶ The Puu Papaa and Koko Head TBGs lease, signed in July 2007, required prepayment of the entire 18-month lease rental upfront. Hence, Puu Papaa's January to May 2009 lease rent and Koko Head's January to February 2009 lease rent, were already prepaid in July 2007.

which time HECO will determine the final business ownership model for the AMI System.

c. The original 2009 estimate of \$414,000 does not include an assumed escalation factor for vendor/consultant or lease rental components.⁷

Based on the foregoing, the total 2009 R&D cost estimate for the AMI project will increase from \$414,000 to \$610,700 as a result of the latest cost estimate for vendor/consultant services. The \$610,700 consists of \$487,700 in vendor/consultant cost and \$123,000 in TGB lease rental. The Company will submit this update at the next opportunity.

⁷ The Sensus lease does contain a provision that "all pricing and fees escalate annually at CPI." See Attachment 1, page 13 of HECO T-13 response to CA-IR-182, Docket No. 2006-0386. However, for the pilot and trial period, Sensus has not applied this provision. The Company does not anticipate Sensus will exercise this clause for the remaining duration of the trial and testing period.

CA-IR-158 DOCKET NO. 2008-0083 ATTACHMENTS 1-4

Attachments 1-4 contain confidential information and will be provided after a Protective Order is issued in this proceeding.

Attachments 1-4 are voluminous and available for inspection at HECO's Regulatory Affairs

Division office, Suite 1301, Central Pacific Plaza, 220 South King Street, Honolulu, Hawaii.

Please contact Dean Matsuura at 543-4622 to make arrangements to inspect the document. An electronic copy of the requested information is being provided.

CA-IR-173

Ref: T-5, page 6 and page 7, HECO 502, HECO-WP-502.

- a. Please provide the actual fuel prices for industrial fuel oil and diesel oil by month, since April 1, 2007.
- b. Please provide excerpts of pricing provisions for both industrial fuel oil and diesel fuel pursuant to the Chevron and Tesoro fuel contracts, as well as illustrative calculations, input value documentation and supporting market price or index documentation for the Company's determination of test year unit prices. Please include taxes, ocean transportation, land transportation, petroleum terminalling and wharfage costs that are included to determine the delivered-to-plant price.

HECO Response:

The information requested in parts a. and b. above is confidential and will be provided after a protective order is issued in this docket. Because the information is voluminous, it is available for inspection at HECO's Regulatory Affairs Division office, Suite 1301, Central Pacific Plaza, 220 South King Street, Honolulu, Hawaii. Please contact Dean Matsuura at 543-4622 to make arrangements to inspect the requested information.

a. The actual purchase prices for Low Sulfur Fuel Oil sold by Chevron and Tesoro and purchased by HECO and actual purchase prices for High Sulfur Diesel sold by Chevron and purchased by HECO each month during the period April 2007 through October 2008 are provided as Attachment 1, pages 1 to 21. The price worksheets show the fuel base price, taxes and estimated cost of land transportation forecast to be applied in the month of purchase.

Although purchases of biodiesel under the terms of the biodiesel supply contract between Imperium Services, LLC and HECO have not yet commenced, HECO would like to report a correction to the April 2008 estimated biodiesel price per barrel used in direct

CA-IR-173 DOCKET NO. 2008-0083 PAGE 2 OF 4

testimony. The April 2008 estimated biodiesel price should be \$230.0413 per barrel instead of \$232.0913 per barrel as stated in the testimony of Mr. Ron Cox, HECO T-5, page 6 and as shown on HECO-502 and other related exhibits. HECO plans to update its fuel oil expense and fuel inventory cost using the corrected April 2008 estimated price of biodiesel in the next opportunity. The price difference is due to a computation error in the estimated taxes included in the biodiesel price. The Hawaii Environmental Response Tax of \$0.05 per barrel was erroneously applied on a per gallon price computation. Thus, the tax component in the biodiesel price should be per gallon and not per gallon as previously calculated. The corrected price computation was provided in Mr. Ron Cox's rebuttal testimony, HECO RT-2, in the Imperium Biodiesel Supply Contract proceeding, Docket No. 2007-0346, filed on September 9, 2008. The information was deemed Level Two Confidential Information and provided under Protective Order No. 24145 to only the Consumer Advocate and the Commission.

- b. Excerpts of pricing provisions for both industrial fuel oil and diesel fuel pursuant to the Chevron and Tesoro fuel contracts, as well as illustrative calculations, input value and supporting market price or index documentation for the Company's determination of test year fuel prices are provided in Attachment 1. The documentation includes the following:
 - Excerpts from the Tesoro Low Sulfur Fuel Oil Contract, base document, dated November 11, 1997 (see Attachment 1, pages 22 to 26). This contract was extended by amendment dated March 29, 2004. The amendment did not address the pricing provision primarily, though certain housekeeping revisions to pricing provisions were made. The amendment document contains exhibits with updated illustrative schedule of prices. In addition, market reference data and other information incorporated in the price

formula for the determination of the April 2008 price as a further illustration of the Tesoro LSFO purchase price determination methodology are provided. See Attachment 1, pages 27 to 42.

- Excerpts from the Chevron Low Sulfur Fuel Oil Contract, base document, dated November 14, 1997 (see Attachment 1, pages 43 to 47). This contract was extended by amendment dated April 12, 2004. The amendment clarified a few pricing provision (reflecting the relatively more complex pricing formula) and such references are included in the attached material. The amendment document contains exhibits with updated illustrative schedule of prices. In addition, the market reference data and other information incorporated in the price formula for the determination of the April 2008 price as a further illustration of the Chevron LSFO purchase price determination methodology are provided. See Attachment 1, pages 48 to 71.
- Excerpts from the Chevron Inter-Island Industrial Fuel Oil and Diesel Fuel Supply
 Contract, base document, dated November 14, 1997, pertaining to the pricing of diesel
 fuel purchased as generation fuel by HECO on Oahu. See Attachment 1, pages 72 to 74.
 This contract was extended by amendment dated April 12, 2004. The amendment
 clarified a few pricing provision (reflecting the relatively more complex pricing formula)
 and such references are included in the attached material. The amendment document
 contains exhibits with updated illustrative schedule of prices. In addition, market
 reference data and other information incorporated in the price formula for the
 determination of the April 2008 price as a further illustration of the Chevron High Sulfur
 Diesel purchase price determination methodology are provided. See Attachment 1,
 pages 75 to 81.

CA-IR-173 DOCKET NO. 2008-0083 PAGE 4 OF 4

- Price of trucking LSFO from HECO's Barbers Point Tank Farm in Campbell Industrial
 Park to HECO's Iwilei Tank Farm is as per PUC approved tariff. Excerpts from the
 Bering Sea Eccotech Fuel Transport Contract dated November 24, 2004 are included as
 Attachment 1, pages 82 to 83.
- Price of trucking diesel from Chevron's Honolulu Distribution Terminal to various
 HECO Distributed Generation facility sites is as per PUC approved tariff for employed
 trucking vendors D&K Trucking Incorporated and alternate trucking vendor Ed
 Yamashiro, Inc. Excerpts from the D&K Petroleum Fuel Transport Contract dated
 September 9, 2005 are provided as Attachment 1, pages 84 to 89.

CA-IR-186

Ref: HECO WP-702, Response to CA-IR-86 (Production M&S Inventories).

Please provide a listing and total valuation for the production supply inventory items in stock at July 31, 2008 that had no issuances from stock in the prior 12 months, indicating why each of such items should not be considered obsolete or not useful in the normal course of business.

HECO Response:

A listing of the production supply inventory items in stock as of July 31, 2008, that have had no recorded issuances from stock since July 31, 2007, is provided as Attachment 1 to this response. This list contains several thousand stock codes. The total dollar value of these items is \$4,944,084. Much of the production inventory is held as "safety stock," to ensure parts supply when unplanned maintenance needs arise. As described in HECO T-7, pages 4 to 6, and HECO-704, the average age of the HECO steam-electric generating units is 45.7 years and the average age of the HECO combustion turbines is 36 years. These generating units were designed and manufactured by a multiplicity of vendors over a 50-year period. Many of the stock items used in these generating units are one of a kind. These considerations drive the need for a larger array of inventory items, some of which are no longer made and/or sources for the items are difficult to find. Attachment 1 is voluminous and is available for inspection at HECO's Regulatory Affairs Division office, Suite 1301, Central Pacific Plaza, 220 South King Street, Honolulu, Hawaii. Please contact Dean Matsuura at 543-4622 to make arrangements to inspect the requested information. An electronic version of Attachment 1 is being provided.

In addition to stocking parts for a mix of aging generation assets whose unique component parts can take added time to source, the lead time to ship parts to Oahu must also be considered when the decision is made to keep an item in stock. With the tight production overhaul schedule

CA-IR-186 DOCKET NO. 2008-0083 PAGE 2 OF 2

operating under limited spinning reserve conditions, the stock-out cost of an item needed in an unplanned event can be very high if the part's unavailability adds to the unit's downtime, thereby impacting HECO's ability to optimize its generation. Stocking decisions are therefore made prudently, to ensure availability of parts for unplanned maintenance requirements.
